DEINOVE- Second convening to a Combined General Meeting on May 30, 2022

DEINOVE (Euronext Growth Paris: ALDEI), a French biotech company, pioneer in the exploration and exploitation of bacterial biodiversity to address the urgent, global challenge of antibiotic resistance, informs its shareholders that the combined Annual General Meeting (AGM) held on May 18, 2022 was unable to deliberate as the required quorum was not reached, and that a new combined AGM will be held on May 30, 2022 at 3 pm CEST, in the premises of Fieldfisher, 48 rue Cambon, 75001 Paris, to deliberate on the same agenda.

The shareholders taking part in the vote at DEINOVE's Combined Annual General Meeting held yesterday owned collectively 1,946,309 shares with voting rights out of a total of 33,308,806 shares with voting rights, or 5.84%. Consequently, in the absence of the required quorum the General Meeting could not validly deliberate on the ordinary and extraordinary resolutions set out in the meeting notice published in the French official legal bulletin *Bulletin des Annonces Légales Obligatoires* (BALO) no 44, dated April 13, 2022.

The shareholders are therefore invited to a second Combined General Meeting to be held on Monday, May 30, 2022 at 3 pm CEST in the premises of Fieldfisher, 48 rue Cambon, 75001 Paris, to deliberate on the same agenda. A second convening notice will be published on May 20, 2022 in the BALO and in a legal newspaper.

All the documents regarding this AGM will be available on the Company's website as from May 20, 2022: <https://www.deinove.com/en/investor-room/documentation-center/general-shareholders-meeting-preparatory-documents>

As a precaution, DEINOVE's shareholders are encouraged to anticipate their votes and to favor the use of postal votes or proxy votes to take part in the AGM.

The shareholders' vote for the first AGM remains valid and counted for the second AGM.

The shareholders are strongly encouraged to vote in advance via email.

ABOUT DEINOVE

DEINOVE is a French biotechnology company pioneering the exploration of a new domain of life, unexplored at 99.9%: the “microbial dark matter”. By revealing the metabolic potential of rare bacteria or still classified as uncultivable, it tackles a global health and economic challenge: antimicrobial resistance.

The new therapies discovered and developed by DEINOVE target superbugs (microbes that have become resistant to one or more antimicrobials) that cause life-threatening infections which are now spreading at high speed.

This breakthrough approach gave rise to one of the world’s first specialized microbiotechnology platforms and a unique collection of nearly 10,000 rare strains and thousands of bacterial extracts. Today, DEINOVE is conducting several development programs, of which its first antibiotic candidate is currently evaluated in a Phase II clinical trial in severe *Clostridioides difficile* infections, one of the world’s first emergencies.

Located at the heart of the Euromedecine park in Montpellier, DEINOVE has been listed on Euronext Growth® (ALDEI - code ISIN FR0010879056) since 2010. The Company has around 50 employees and relies on a network of world-class academic, technological, industrial and institutional partners.
